GameZone — Webpage Documentation

Introduction

GameZone is a gaming and esports community webpage made with HTML and CSS. It brings game information, upcoming tournaments, gaming teams, player rankings and gaming news together in one place. The design uses a dark background with sky-blue highlights to make important content easy to notice.

Features

- Navigation links to Home, Games, Tournaments, Teams, Rankings and News.
- Popular game cards for Valorant, BGMI and Minecraft.
- Upcoming tournament dates with Register buttons.
- Featured team cards and a player leaderboard with ranks and points.
- Gaming news cards, community call-to-action and footer.
- Responsive CSS layouts and hover effects for a better browsing experience.

Applications and Conclusion

Applications

- Gaming communities can share information about games and teams.
- Esports organisers can display tournament dates and registration options.
- Players can view example rankings and compare leaderboard points.
- Gaming clubs can publish announcements, tips and community updates.
- Students can use the project to practise HTML structure and CSS styling.

Conclusion

The GameZone webpage presents gaming and esports information in a clear, organised layout. HTML provides the page content, while CSS controls the colours, spacing, cards, responsive layout and hover effects. This project is a useful beginner-level example of designing a multi-section webpage.
